EXPERIENCE

SDE-I (Android)

Visit Health PlayStore App Link

Jan 2025 – Current Noida, India

- Introduced **Hilt DI**, **MVI Architecture**, **Clean Architecture** -> increased the developers efficiency by more than **70%**
- Made **VisitDna** - Design System for visit
- Made **VisitAgent** which takes highest occurring crash fro crashlytics and create a brnach -> write fix -> **make PR** -> **write RCA and how to re-produce**
- Took ownership of multiple big features and shipped successfully along with writting **Unit test cases**
- Resolved multiple crashes and ANRs resulting app **99.74%** crash free

SDE-I (Android)

BlueStone PlayStore App Link

Feb 2024 – Jan 2025 Bengaluru, India

- Solved **GA4** Un-Assigned traffic(approximately 30%) issue, resulting in better insights for the bussiness.
- Added multiple features using MVVM architecture with API implementation(used **dagger** for DI)
- Solved multiple live crashes which improved user retention by 10%
- Made the app **99.7%** crash-free single handedly
- Used **Pro-Guard** for obfuscation(making app secure from reverse engineering)
- Handling all the new features alone(Single developer) and updating on play store

SDE-I (Android Intern)

GeeksForGeeks PlayStore App Link

June 2023 – Jan 2024 Noida, India

- Added **Rewarded Ads using google Admob** which increased revenue
- All Courses Revamp , **Api Implementation in MVVM architecture pattern** and **Single Activity Architecture**
- Notifications for multiple use-cases using **Firebase FCM**
- Iplemented **Photo Picker**
- Resolved Multiple bugs and crashes

EDUCATION

B.E in Computer Science & Engineering (8.04/10 CGPA)

The University of burdwan, West bengal

Aug 2019 – June 2023

SKILLS

- Languages

KOTLIN | JAVA | Javascript

- Tools

Android Studio | Git | Firebase | GA4 | Crashlytics | Pro-Guard | WebEngage | MixPanel | Dex-Guard | CI/CD | Amplitude | PubNub | CleverTap

- Architecture

MVVM | MVI | MVP | Single Activity Architecture | Clean Architecture

- Libraries

Retrofit | Glide | Volley | Picasso | Room | Realm | Dagger | Hilt | Shimmer | Lottie | Leak Canary | GSON | Epoxy | JUnit | mockK | Turbine

- Kotlin-details

Coroutines | livedata | flow | Dipendency Injection | SOLID principles | Design Patterns

PROJECTS

NotesApp - A Notes app

Android App

Dec 2024 PlayStore App Link

- **MVI Architecture** based notes app, written in **Kotlin** and **Compose**.
- For **Database** used **Room**.
- Using **Dagger2** for Dependency injection
- Used **self-made Api's** for saving and gettting user specific notes
- Using **node.js, express.js** for creating Api's
- Using **jwt** for user authentication
